Cord Wood Specification Sheet

General

Produced from forestry and clearance work, cut and stacked in required lengths.

All cord wood must be UK sourced and in accordance with relevant felling licenses and planning permissions applicable.

Acceptable Material

Cord Wood
All species are acceptable, material must be straight, single stem and free from green leaf. Typically cut to 3m =/-10%, diameter range of 5cm-80cm

Contamination in Loads

Loads must be clean and substantially free from contamination or run risk of additional charges or immediate rejection from site.

For example, but not limited to: Arb chip, arb shred, non-virgin wood (waste wood all grades), fossil fuels, plastic, sand, rock, soil, stone, mud or other mineral elements, metal, litter, non-virgin wood, diseased timber, burnt material, green vegetative content such as green leaves, needles or foliage, annual crops, snow, ice and frozen structures.

Sylvagen retains the right to review and modify this specification. Reasonable notice will be given prior to any change of specification. In the event of a rejection any and all costs associated with rejection and disposal of the material will be borne by the supplier.
